Precipitation probability					
20%	30%	40%	50%	20%	10%

Forecast for Tuesday 25 May 2021

Weather: Rather cloudy start today then brighter or sunny spells developing this morning however there will be some showers especially around the Argyll ranges. During the afternoon the showers will get less frequent with more in the way of sunshine particularly for more westerly ranges around Arran and Arrochar. Showers will tend to die out this evening with a sunny end to the day.

Chance of cloud free mountain/hill tops above 800m: 60% chance, cloud shrouding the munro tops at times especially as showers group together or heavier showers move through the area, more northerly hills will see more in the way of lower cloud, becoming 80% in the afternoon as showers die out.

Visibility: Patches of poor visibility at first with cloud bases around 500m especially in the north around Lochaber. During the morning the cloud bases will lift and break to be above the summits but will lower once again in heavier showers or when showers group to give longer spells of rain, then bases will be around 600m temporarily. Further south west around Loch Lomond and Arrochar tops will generally be clear. Outwith showers in the afternoon visibility will be very good with good views likely and showers should be easy to spot approaching.

Freezing Level*	1200m	1300m	1300m	1400m	1400m	1300m	1300m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Feeling very cool again in fresh northerly winds especially in heavier showers with sleet on the tops, quite a wintery feel with freezing level around the highest summits.

Forecast for Wednesday 26 May 2021

Weather: Cloudy overnight with a few showers expected, some areas in the west will likely stay dry overnight. Some sunny spells developing and then a few showers during the morning. These will die out in the afternoon with some bright and sunny conditions likely, a dry and clear night ahead, feeling warmer by the afternoon too.

Maximum wind: Northwesterly 10 -15 mph, winds will fall light in the afternoon.

Chance of cloud free mountain/hill tops above 800m: 80%, tops generally clear but perhaps a few patches of cloud early in the morning and in any heavier showers especially for northern peaks.

Visibility: Generally very good visibility in the northerly airstream but visibility dipping in any heavier showers and if cloud gathers over munro tops for a time.

Temperature: **Glens:** Plus 5 rising to 13 Celsius.
At 800m: Plus 3 rising to 7 Celsius.
Freezing level: Above the summits.
